Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4, 6-12, 14, 15 and 18-24 is/are pending in the application.
- 4a) Of the above claim(s) 18-24 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4, 6-12, 14 and 15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the at least a portion of the third outside diameter being substantially equal to the first outside diameter (claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

The indicated allowability of claims 5, 6 and 10 are withdrawn in view of the newly discovered reference(s) to Keith et al U.S. Pat. No. 5, 395,334 and Sogard et al U.S. Pat. No. 5,447,497. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 7-1¹⁴₁₅ are rejected under 35 U.S.C. 102(b) as being anticipated by Keith et al U.S. Pat. No. 5,395,334.

Art Unit: 3763

Keith discloses a first component (82) and a second component (36), in the pre-assembly state at least a portion of the first component overlapping at a bonding site at least a portion of the second component (fig. 2), the at least a portion of the first component having a first outer diameter and the at least a portion of the second component having a second outside diameter (fig. 2); and a third component (adhesive (no reference numeral given)), in the pre-assembly state at least a portion of the third component overlapping at the bonding side at least one of the at least a portion of the first component and the at least a portion of the second component (fig. 2), the at least a portion of the third component having a third outer diameter (fig. 2), wherein in the assembled state the at least a portion of the first outside diameter being substantially equal to the second outside diameter and the at least a portion of the third outside diameter being substantially equal to the first outside diameter (fig. 2); as to claim 2, (82); as to claim 3, (36/38); as to claim 4, (36/38); as to claim 7, (fig. 2); as to claim 8, (36/38); as to claim 14, (26); as to claim 15, (26).

Claims 9, 11+12 are considered product-by-process claims. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same or obvious from a product of the prior art, the claim is unpatentable even though the product was made by a different process." In re Thorpe, 777 F.2d 695, 698 227 USPQ 964, (66 Fed. Cir. 1985). Basically, Burns discloses a catheter having the recited structural relation between the first component and the second component.

Art Unit: 3763

Clearly, the first component and the second component bonded together. The claim describes how they are bonded together which indicates a process. Process limitations in a product claim are given little patentable weight.

Claims 1-4, 6-1⁴₂⁺¹⁵, are rejected under 35 U.S.C. 102(b) as being anticipated by Sogard U.S. Pat. No. 5,447,497.

Sogard discloses a first component (20) and a second component (26), in the pre-assembly state at least a portion of the first component overlapping at a bonding site at least a portion of the second component (fig. 3 and 4), the at least a portion of the first component having a first outer diameter and the at least a portion of the second component having a second outside diameter (fig. 3 and 4); and a third component (28), in the pre-assembly state at least a portion of the third component overlapping at the bonding side at least one of the at least a portion of the first component and the at least a portion of the second component (fig. 3 and 4), the at least a portion of the third component having a third outer diameter (fig. 3 and 4), wherein in the assembled state the at least a portion of the first outside diameter being substantially equal to the second outside diameter and the at least a portion of the third outside diameter being substantially equal to the first outside diameter (fig. 3); as to claims 2-4, (fig. 3); as to claim 6, (3 and 4); as to claims 9 and 11-13, (the same rejection as above applies in this rejection); as to claims 7, 8, 14 and 15, (figs. 3 and 4).
